DOJ Requests regarding the Missouri/Arkansas Application

Related to Market Share Information:

Q1. In paragraph 6 of the Gary Smith Arkansas affidavit, the number of access lines is given as 1,034,000. Yet, in an August 23rd SBC ex parte, a different number is given, 1,128,000. Please explain the difference.

A1. There are two reasons the numbers differ between those found in the Gary Smith affidavit and the 8/23 ex parte. Mr. Smith excluded Resold lines from the total in his affidavit, while the 8/23 ex parte included them. And, the Smith number reflects access lines, excluding Resale, as of June, 2001, while the 8/23 ex parte showed a total through December, 2000.

Q2. Please provide the following for both Missouri and Arkansas:

Total universe of lines in SWBT territory

Total lines served by SWBT

Break down total lines served by SWBT by business and residence services

Total lines served by CLECs

A2. Please see attached spreadsheet ("DOJ/MO-AK Q2").

Regarding Performance Measures:

Q3. It appears that for DS1 PMs for timeliness and missed due dates, the performance is improving. Yet, PMs for quality are declining. Why?

Q4. Please explain the reduced performance in the DSL PMs.

A3 and A4. A conference call has been scheduled to discuss Performance Measures, Friday, 9/7 at 9:00 AM Eastern. The conference bridge number is 800-220-0688, passcode 3268834#.
